

# ACHIEVE MORE WITH BBH

## SEAMLESS SECURITY AND COMPLIANCE FOR THE TRI-STATE AREA

Security and compliance are the lifeblood of any financial institution's IT infrastructure, but managing these on your own can be complex. There is no "out of the box" solution that will ensure regulatory compliance. The same goes for protecting your clients' personal information. Successfully maintaining a compliant security posture while meeting reporting and audit standards requires a holistic approach and in-depth understanding of best practices.

Partnering with a managed service provider (MSP) allows financial institutions the freedom to offload their complex IT tasks to a specialized team with industry-leading resources. This way, the bank can focus on core business initiatives while resting assured that they are meeting the necessary compliance requirements.

### The BBH Difference

Not all MSPs are created equal. It's important to partner with a company that understands the unique nuances of your industry in order to reap all of the benefits they can offer you. For the financial sector, this means partnering with a service provider that understands both state and federal compliance landscapes, audit requirements and cybersecurity. At BBH, we tailor every solution with the products, services and configurations needed to protect your business and save you money.

#### Security & Compliance Experience

Our team at BBH has over 30 year of experience supporting IT infrastructure within the financial sector. We understand the unique security and compliance scrutiny that is placed on financial institutions and we've tailored our best practices around them. We offer a full suite of security services, from anti-virus/anti-malware protection and remote monitoring to reporting and audit planning.

#### Cost Savings

Our subscription-based offerings allow you to utilize the solutions that fit your needs without paying for services you don't need. Whether you need the full stack of managed services or you're just looking to supplement your onsite IT staff, BBH has a solution for you.

#### SOC 2 Certified

Maintaining SOC 2 compliance is important for any financial institution that stores client information in a cloud setting. While your financial institution itself may not require a SOC 2 certification, the vendors you use to store and manage your data do. BBH is a SOC 2 certified provider that specializes in the nuances of SOC 2, from ensuring the confidentiality of all client information to protecting against unauthorized access attempts.

#### A Local Touch

As a New York City-based vendor, BBH understands the unique needs of financial institutions around the tri-state area. We have dedicated staff familiar with the policies and regulations of the region and can dispatch skilled resources as needed to meet all of your business needs.

## Solutions

BBH has a full suite of products and services that are designed to help you achieve your security, compliance and business productivity goals. Every solution we offer is backed by our 30+ years of industry experience, and we work hard to continuously evolve our practice and include only the solutions that meet industry standards.
