BBH Solutions

Recognized on CRN's 2023 MSP 500 List

BBH Solutions, Inc., announced today that it has been named to the CRN® Managed Service Provider (MSP) 500 list in the Managed Security 100 category for 2023. CRN's annual MSP 500 list identifies the leading service providers in North America whose forward-thinking approaches to managed services are changing the landscape of the IT channel, helping end users increase efficiency and simplify IT solutions, while maximizing their return on investment.

MSPs have become a vital part of the success of businesses worldwide and not only empower organizations to leverage intricate technologies, but also help them keep a strict focus on their core business goals without straining their budgets.

The annual MSP 500 list is divided into three sections: the MSP Pioneer 250, recognizing companies with business models weighted toward managed services and largely focused on the SMB market; the MSP Elite 150, recognizing large, data center-focused MSPs with a strong mix of on- and off-premises services; and the Managed Security 100, recognizing MSPs focused primarily on off-premises and cloud-based security services.

Selection to the Managed Security 100 is an acknowledgement of BBH's expertise and growth as a comprehensive Information Security and IT compliance provider. BBH's security-focused services include round the clock monitoring and threat mitigation, patch management, employee cybersecurity training, and security reporting and audit assistance.

"In addition to having to adjust their own business operations to account for the changed conditions during the pandemic, MSPs have also seen increased demand for their managed communications, collaboration and security services," said Blaine Raddon, CEO of The Channel Company. "The solution providers on our 2023 MSP 500 list deserve credit for their innovative and game-changing approaches to managed services in these unpredictable times, as well as their ability to optimize operational efficiencies and systems without straining IT budgets."

"We are very proud of our selection to the MSP 500, and to be recognized on the Security 100 list" said Bruce Hoernecke, President and CEO of BBH Solutions. "With the constantly changing threat landscape, managing the daily security workload can become exhausting to an organization's resources. It's our mission to educate our clients' staff on threat awareness and to provide services and automation that address everyday security tasks. This gives their security teams the confidence and time to dedicate resources to focus on strategic security projects."

The MSP 500 list was featured in the February 2023 issue of CRN and online at www.crn.com/msp500.
